Subject: Winemucca Trading Company - Lime Disposal

Angela,

Darryl Johnson contacted me again this afternoon regarding transporting the lime currently stored at the former Shasta Paper Company Mill properties to agricultural lands in Shasta County.

I explained that I have been waiting for Jeff Scharff to contact me regarding this and other outstanding compliance issues, but that I haven't heard back from Mr. Scharff. I also explained that we needed a formal written proposal to remove the lime from the site, similar to the proposals to clean the clarifiers and holding basins. I indicated that information we would want to see in the proposal should include volume of lime to be disposed, where its located on the mill property, disposal location and property owner info, property owner approval to accept the lime, info regarding application at agronomic rates, schedule, and then shipping papers and receipts indicating the lime made it to the approved destination.

I told Darryl that they needed professional oversight to verify proper disposal. He asked if he could write the proposal, and I indicated that I did not have concerns if he wrote the proposal, but that professional oversight was still necessary.

Darry stated that he would contact Jeff Scharff to get this moving.

Dale
